Test Introduction script

Hi! Thank you so much for taking the time to help me out today. My name is Matthew Brunner, and I'm a computer science student at the University of West Georgia. I'm currently working on a senior project for my User-Centric Computing course where we're designing and building websites based on real user needs.

This session should take about 15 to 20 minutes of your time, and I really appreciate you being here.

I want to start by making something very clear: you are not being tested. There are no right or wrong answers here, and you can't make any mistakes. What we're actually doing is testing the website itself to see how well it works for real people like you. Your honest feedback—whether positive or negative—is incredibly valuable and will help me improve the design.

The website I've built is called FreshStart, and it's a career transition platform designed to help adults in their 30s through 50s who are thinking about changing careers. It includes tools like a skills translator, mentor matching, training resources, and job opportunities. But I don't want to tell you too much more than that—I actually want to see how easy it is for you to explore and figure things out on your own without me explaining everything.

By participating today, you're helping me understand what works well on the site and what might be confusing or difficult for users. I'm looking to get a general sense of the website's usability—things like whether the navigation makes sense, if the forms are clear, and if you

can accomplish the tasks you'd expect to do on a site like this. Your perspective as someone actually using the site is way more valuable than just my assumptions about how it should work.

As we go through this, I'm going to ask you to try completing some specific tasks, and I'd like you to think out loud as you do them—just tell me what you're thinking, what you're looking for, or if anything seems confusing. Again, there's no pressure to succeed at anything. If something doesn't work or you can't figure something out, that's actually really helpful information for me.

The website is live at . I'll give you that link in just a moment, and we'll get started.

Do you have any questions before we begin?

The 10 Tasks users must complete and your observations Here you will ask the user to be at ease and complete the tasks listed below You must observe and collect/note necessary information on the left	
Task 1: Find and click on the Skills Translator tool	Completed successfully: yes Time taken: 3 seconds Facial expressions: straight faced Any noises made: “Okay” Any other gestures made: none
Task 2: Navigate to the registration page	**Completed successfully: yes** **Time taken: 2 seconds** **Facial expressions:** **Any noises made: “Okay”** **Any other gestures made: none**
Task 3: Fill out and submit the registration form	**Completed successfully: yes** **Time taken: 52 seconds** **Facial expressions: straight faced** **Any noises made: none** **Any other gestures made: tilted head back to read**
Task 4: Find information about available mentors	**Completed successfully:** yes **Time taken:** 5 seconds **Facial expressions: Straight faced** **Any noises made:** “oh uh” *click* **Any other gestures made: none**
Task 5: Browse training program options	**Completed successfully: yes** **Time taken: 2 seconds** **Facial expressions: straight faced** **Any noises made: none** **Any other gestures made: none**
Task 6: Read a success story	**Completed successfully: yes** **Time taken: 12 seconds** **Facial expressions: straight faced** **Any noises made: mumbled the words while reading** **Any other gestures made: none**
Task 7: Access the job board	**Completed successfully: yes** **Time taken: 3 seconds** **Facial expressions: straight faced** **Any noises made: "pretty easy”** **Any other gestures made: none**

Task 8 : Log in to an account	**Completed successfully: yes** **Time taken: 25 seconds** **Facial expressions: straight faced** **Any noises made: none** **Any other gestures made: none**
Task 9: Navigate from homepage to any feature page	**Completed successfully: yes** **Time taken: 8 seconds** **Facial expressions: squinted at me** **Any noises made: "huh"** **Any other gestures made: none**
Task 10: Use the Skills Translator to translate skills from one industry to another	**Completed successfully: yes** **Time taken: 31 seconds** **Facial expressions: thinking face** **Any noises made: "I dont even know what to choose"** **Any other gestures made: none**
User's opinions/comments/suggestions about the site	
• User liked the easy and straight forward layout of the website • User didnt like how signup and login were similar to the other buttons and next to each other • User also loved the sleek design and cool colors	
The "Thank You" note to conclude the test	
Thank you for your time and effort, we will take your comments and results into consideration to create the best possible website for our users.	
Your experience, assessment of the Usability Test	
Nothing really change anything. It seemed sort of repetitive to do 10 tasks. Also I stated 5-10 minutes and it was 10 minutes

Test Introduction script	

Insert here the introductory speech you gave to the participant to put her at ease and inform him/her about what is expected. You know from our Usability Testing lectures, and videos that an introduction is necessary.
The following items must be present here -
• *Your formal introduction*
  ○ *Your name*
  ○ *What you do*
  ○ *And so on*
• *The purpose of the session and the time it might take*
• *Put the users at ease by ensuring that they are not being tested in any way, but rather they are helping us by testing a product for us!*
• *Explain about your website – do not give them too many details, we want them to explore and find out.*
• *Explain how the participant is helping you by participating.*
  ○ *Explain what you expect to find*	

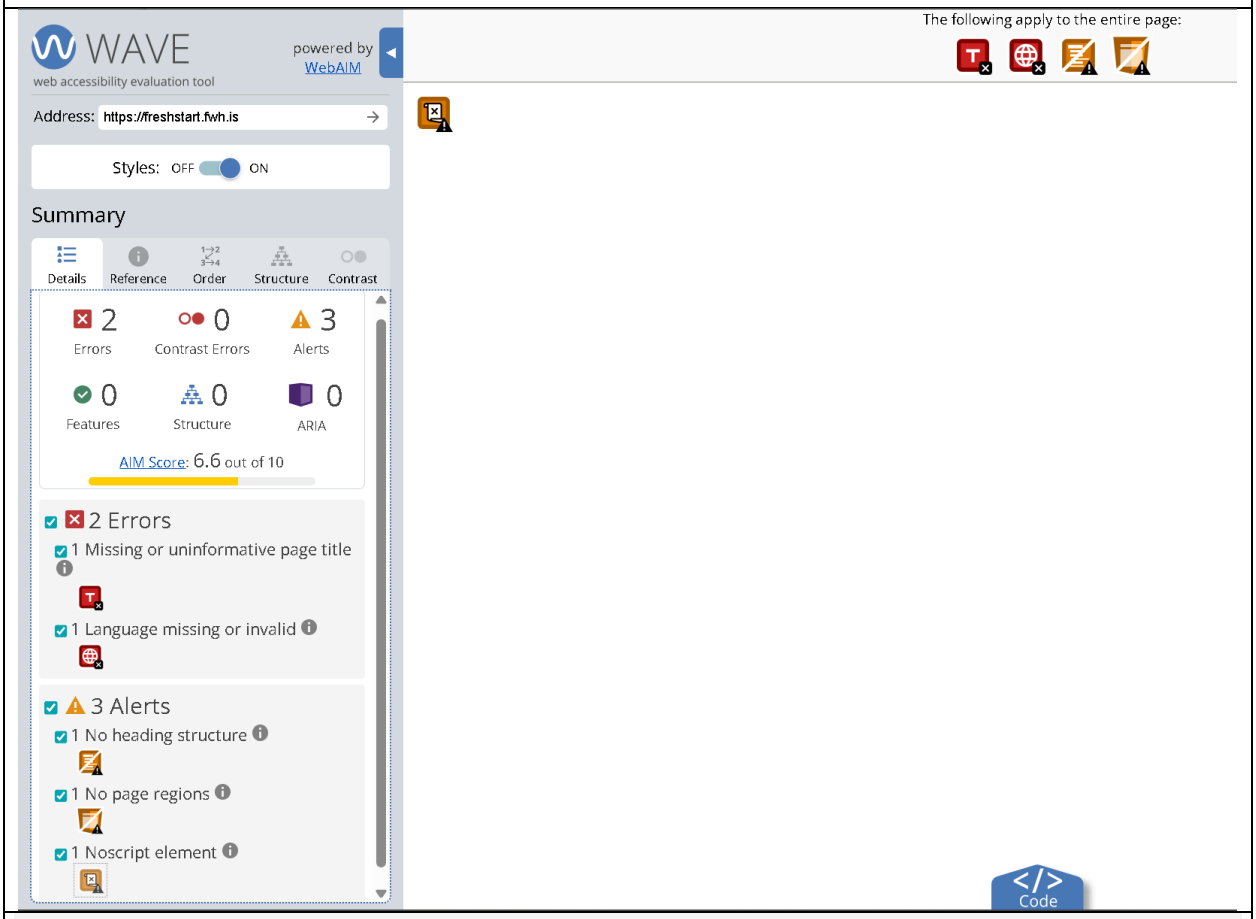
- *Do not tell them exact results that you hope to find, you will bias them that way*
- *Explain to them that you are trying to get a general understanding of the site's usability, what works and what does not for a user.*

- *Now point them to the website that they will have to test by giving them the URL.*

The 10 Tasks users must complete and your observations Here you will ask the user to be at ease and complete the tasks listed below You must observe and collect/note necessary information on the left	
Task 1 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 2 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 3 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 4 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 5 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 6 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 7 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 8 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
Task 9 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:**

	Any other gestures made:
Task 10 (description of the task)	**Completed successfully:** yes/no **Time taken:** in seconds **Facial expressions:** **Any noises made:** **Any other gestures made:**
User's opinions/comments/suggestions about the site	
Ask the users about the site and insert their answers here. *Questions that you must ask are below, but you are more than welcome ask them other questions you deem necessary -* • *what they liked* • *what they didn't like* • *what suggestions they can provide to make the site better for users*	
The "Thank You" note to conclude the test	
Insert the closing remarks with your Thank You speech here.	
Your experience, assessment of the Usability Test	
Insert your own assessments of the test, your experience here, if there is anything you would do differently next time, if anything else needs to be added to this document, and so on.	

Accessibility tests and Markup validation

Member 1 Name


Issues: 1 Missing or uninformative page title

1 Language missing or invalid *1* No heading structure No page regions 1 Noscript element
Insert the HTML validation screenshots here List the Markup issues found here *It wouldnt let me search it with this validator even when messing with DNS names*
Member 2 Name
Insert the Accessibility test screenshots here
List the issues found here
Insert the HTML validation screenshots here
List the Markup issues found here

Team's assessments

Usability test results, discussions, analysis
All team members tested with users in the target age range (30-50). *Overall, users found the site intuitive with clear navigation.* *All users completed tasks successfully with minimal confusion.* *Common positive feedback: clean layout, easy navigation, professional design, detailed content. Common suggestions: differentiate signup/login buttons more clearly, add search functionality, make some pages less text-heavy. Average completion time was 10-15 minutes.*
Accessibility issues
WAVE accessibility testing revealed several issues across the FreshStart website: **Errors Found:**

- Missing or uninformative page title: The page title is either missing or doesn't adequately describe the page content, making it difficult for screen reader users to understand what page they're on.
- Language missing or invalid: The HTML lang attribute is missing or incorrectly set, which prevents screen readers from properly pronouncing content and applying correct language rules.

Alerts Found:

- No heading structure: The page lacks proper hierarchical heading structure (h1, h2, h3, etc.), making it difficult for screen reader users to navigate and understand content organization.
- No page regions: Missing ARIA landmark regions (header, main, nav, footer) that help screen reader users quickly navigate to different sections of the page.
- Noscript element present: A noscript element was detected, which may indicate reliance on JavaScript that could affect accessibility.

Overall Assessment: The site received an AIM (Accessibility Impact Measure) score of 6.6 out of 10. While there were no contrast errors, ARIA errors, or structural issues, the missing semantic HTML elements and page metadata significantly impact usability for assistive technology users.

Steps to remedy these issues:

1. Add a descriptive, unique page title to each page using the

HTML Markup issues
List any markup issues your team has found and the steps your team will take to remedy them.
